About Me

Keith Darren is a licensed civil engineer with over five years of experience in the construction industry. His background spans project management, quality assurance and control, and cost estimating for residential, commercial, and infrastructure projects.

With his diverse experience, Keith has developed a strong awareness of every stage of construction. He's passionate about learning and continuously improving his craft – always striving to deliver accurate, reliable, and quality results in every project or task he takes on.

Experience

Cost Engineer / QAQC Engineer | JC Pinon Construction Inc.

March 2024 - Present

Road Widening Project

- Prepared the project implementation plan which includes project construction budget, baseline schedule (S curve and Banana Curve), risk management plan and project quality plan.
- Prepared cost performance reports and variance summaries, highlighting areas of overrun and potential cost reduction without compromising quality or schedule.
- Prepared and submitted project performance reports, summarizing cost status, and progress

Road Widening & Slope Protection Projects

- Monitored project cost performance by comparing actual expenditures against the approved cost plan to identify items with cost overruns and savings.
- Conducted cost impact analysis for variations and change orders, ensuring alignment with contract scope and approved budget.
- Reviewed and verified material specifications prior to procurement to ensure compliance with project plans, and project specifications.
- Prepared and submitted project performance reports, summarizing cost status, and progress

Construction of Port Projects.

- Assisted the engineering department in quantifying all project scopes based on contract drawings and specifications for bidding and cost estimation purposes.
- Supported the construction team in reviewing and confirming material specifications to ensure compliance with project standards and technical requirements.

- Coordinated with suppliers and engineers for material evaluation and approval prior to procurement and site use.
- Prepared and submitted project performance reports, summarizing cost status, and progress.

QAQC Engineer | AE Centeno Construction

May 2022– March 2024

4 – Storey Commercial Building With Lower Ground floor & 2 Basement.

- Coordinated with trade contractors prior to the commencement of work to ensure readiness and proper sequencing of activities.
- Reviewed and verified material specifications before endorsement to the Project Manager for Request for Approval (RFA).
- Prepared the concrete pouring sequence plan and checked that reinforcement cutting lists were aligned with the approved pouring schedule.
- Quantified actual concrete requirements for each pour and coordinated with the batching plant and site team for accurate delivery.
- Attended and witnessed material testing activities, compiled all test results, and confirmed that materials complied with project specifications.
- Ensured that all site works were executed according to approved plans and specifications prior to turnover for inspection.
- Maintained and submitted organized QA/QC documentation and test reports as attachments for project billing and performance reporting.

Project Site Engineer | Tophomes Finishing Inc.

July 2021 – April 2022

Housing and Land development Project

- Created detailed Bills of Quantities and cost breakdowns for special projects based on approved drawings and specifications.
- Quantified materials and resources required for various construction activities to support accurate budgeting and procurement.
- Supervised site operations covering structural, architectural, civil, and finishing works to ensure compliance with approved plans and specifications.
- Monitored work progress, schedules, and accomplishments of both in-house crews and subcontractors, including material delivery coordination.
- Prepared accomplishment reports, evaluated progress billings, and ensured timely submission for management and client review.
- Oversaw land development activities such as site clearing, grading, road construction, concrete pavements, sidewalks, and installation of RCP and water line pipes.
- Prepared cost estimates for subcontracted works and third-party contractors, ensuring fair and accurate evaluation prior to award.

Jr. Civil Engineer | Grandsky Building Construction

March 2020 – July 2021

4 – Storey School Building with basement

- Assisted in cost estimation, document control, and preparation of daily accomplishment reports to support project progress monitoring.
- Assisted in the preparation and revision of shop drawings.
- Supervised and ensured that site works were implemented according to approved plans, specifications, and quality standards.
- Monitored work progress of in-house teams and subcontractors, including material deliveries and activity scheduling.
- Coordinated with subcontractors and provided technical assistance on structural and civil works.
- Helped in evaluating subcontractors' progress billings by verifying actual accomplishments and quantities prior to approval.

Independent Projects (Freelance Civil Engineer)

Express Carwash – Denton, Texas, USA

- Quantified civil works including erosion control, demolition, and cut-and-fill materials for bidding purposes.

Residential Villa – Dubai Hills, UAE

- Quantified structural works from foundation to roof beams, including rebar, concrete, formworks, masonry, and waterproofing for bid estimation.

Cross Road Detention Tank – Bulacan, Philippines

- Verified rebar, formworks, and concrete quantities against contract provisions to ensure accuracy for client evaluation.

Land Development Project – Batangas, Philippines

- Quantified earthworks, slope protection, masonry, and paving works for inclusion in bidding documents.

Land Development Project – Quezon Province, Philippines

- Quantified earthworks, slope protection, masonry, and paving works for bidding purposes

Proposed 2-Storey Residential House – Caloocan, Philippines

- Quantified structural (rebar, formworks, concrete) and wet works (CHB laying, lintel beams, stiffener columns, plastering) to assist a labor-only subcontractor in price negotiation.

Proposed 3-Storey Residential House – Parañaque, Philippines

- Quantified structural (rebar, formworks, concrete) and wet works (CHB laying, lintel beams, stiffener columns, plastering) to assist a labor-only subcontractor in price negotiation.

Proposed Warehouse – Pampanga, Philippines

- Quantified structural (rebar, formworks, concrete) and wet works (CHB laying, lintel beams, stiffener columns, plastering) to assist a labor-only subcontractor in price negotiation.

4-Storey Commercial Building – Quezon City, Philippines

- Quantified structural (rebar, formworks, concrete) and wet works (CHB laying, lintel beams, stiffener columns, plastering) to assist a labor-only subcontractor in price negotiation.
- Prepared weekly progress billings based on actual accomplishments.

5-Storey Hospital Building – Quezon City, Philippines

- Quantified structural (rebar, formworks, concrete) to assist a labor-only subcontractor in price negotiation.
- Prepared weekly progress billings and verified quantities for client submission.

Education

Bachelor of Science in Civil Engineering – Dagupan Pangasinan

2014-2019

Training & Certifications

- | | |
|--|----------------|
| • Advance Project Planning and Scheduling with Primavera P6 | September 2025 |
| • Project Planning, Scheduling, and Control using Primavera P6 | May 2025 |
| • Structural Analysis and Design Using STAAD and RCDC | July 2022 |

I hereby declare that the details and information given above are complete and true to the best of my knowledge.
